CATàSYNTH
SPECIALITY CHEMICALS

o/c

Ref. No.: CSCPL/MOEF/2026-27/46

Date:27 May 2026

To,

The Regional Officer,
Ministry of Environment, Forest and Climate Change (MoEF) – Bangalore,
SEIAA – Karnataka,
Forest, Ecology and Environment Department,
Room No. 706, 7th Floor, 4th Gate,
M.S. Building,
Bangalore – 560001

Subject: Submission of Compliance Status Report for Environment Clearance (EC) – Reg.

Reference:

- Environment Clearance No. SEIAA 15 IND 2016 dated 26-04-2017
- Corrigendum to Environment Clearance dated 21-09-2019
- Amendment to Environment Clearance, dated 31.05.2025

Dear Sir,

With reference to the above-mentioned Environment Clearance (EC) issued to Catasynth Speciality Chemicals Pvt Ltd, we hereby submit the Half-Yearly Compliance Status Report for the period October 2025 to March-2026.

We request you to kindly acknowledge the receipt of the same.

Thank you,

Yours faithfully,
For Catasynth Speciality Chemicals Private Limited

Authorized Signatory

Enclose: Environment clearance compliance copy and relevant annexures mentioned in the compliance report

CC To,

The Environmental Officer, Karnataka State Pollution Control Board, Parisara Bhavana, 10B, Baikampady Industrial Area, Mangalore – 575011, Karnataka

Catàsynth Speciality Chemicals Private Limited

COMPLIANCE REPORT TO THE CONDITIONS STIPULATED IN THE ENVIRONMENTAL CLEARENCE ISSUED BY SEIAA, KARNATAKA

Vide

No. SEIAA: 15 IND: 2015 dated on 26th April 2017

FOR

M/s. Catasynth Speciality Chemicals Pvt Ltd.

COMPLIANCE TO ENVIRONMENTAL CLEARANCE

for the period of October-2025 to March-2026

Sl No.	Condition	Compliance to Condition
	PART A - SPECIFIC CONDITIONS	
01	National Emission Standards for Organic Chemicals Manufacturing Industry issued by the Ministry vide G.S.R. 608(E) dated 21st July 2010 and amended time to time shall be followed by the unit.	The applicable National emission standard for organic chemical manufacturing Industry is being followed and complied.
02	The total wastewater generation shall not exceed 330.1 KLD. The industrial effluent of 295.1 KLD shall be treated in CETP of MSEZL. The project proponent shall submit a MoU entered in to with MSEZL in this regard along with route map of effluent pipe and operational arrangements. The MoU shall also cover the safety aspect of the pipe line carrying effluent to the CETP.	There has been no deviations from waste water generation. Average industrial effluent generation is 65KLD. MOU with MSEZ CETP is already in place for discharge of treated effluent. Annexure-1 attached (MOU with MSEZL CETP)
03	The project proponent shall ensure safe and scientific disposal of the treated water that would be available in excess of the treated water proposed to be recycled.	Wastewater from the process is being treated at ETP consisting of Evaporation and Biological treatment. Followed by biological treatment, the partially treated water is being sent to CETP for further treatment. Blowdowns from Boiler & Cooling towers are treated at Reverse Osmosis plant and treated water is used for internal requirements.
04	Total water requirement from MSEZL water supply shall not exceed 688.3 KLD and prior permission shall be obtained from the concerned Authority. No ground water shall be used.	Agreed. Total water requirement from MSEZL is within the quantity specified. No ground water is used
05	The process emissions from the boiler shall be dispersed through stack of Adequate height as per CPCB/ KSPCB standards. The gaseous emissions from the DG set/ Boiler shall be dispersed through stack height as per CPCB/KSPCB standards shall be provided. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution.	Boiler & DG chimney are installed as per CFO norms. And stack emissions are being dispersed as per the consent conditions. Acoustic enclosure is provided for DG.

06	Ambient air quality data shall be collected as per NAAQS standards notified by the Ministry vide G.S.R. No. 826(E) dated 16th September 2009. The levels of PM10, PM2.5, S02, NOx, CO, VOC, HBr, NH3, H2S, HF and HCl shall be Monitored in the ambient air and emissions from the stacks and displayed at a convenient location near the main gate of the company and at important public places. The company shall upload the results of monitored data on its website and shall update the same periodically. It shall simultaneously be sent to the regional office of MoEF - Bangalore, SEIAA - Karnataka, the respective zonal office of CPCB and the KSPCB.	Ambient air quality are monitored through NABL accredited lab. Monitored results have been submitted to regional offices of MOEF & KSPCB along with the compliance report on 27 Nov 2025. Compliance reports are also uploaded in the company portal.
07	The proponent shall ensure that the effluent disposal pipeline is monitored by the company, and it shall be ensured that there is no leakage from the pipeline. In case of any such eventualities, the company shall immediately stop disposal through the pipeline and take the corrective measures.	The effluent disposal to CETP is monitored regularly and conditions of the pipelines are in good conditions
08	The company shall upload the status of compliance of the stipulated environmental clearance conditions, including results of monitored data on its website and shall update the same periodically. It shall simultaneously be sent to the Regional office of MoEF - Bangalore, SEIAA - Karnataka, tl1e respective zonal office of CPCB and the KSPCB. The levels of PM10, PM2.5, S02, NOx, CO, HBr, NH3 H2S, HF and VOC (ambient levels) and emissions from the stacks shall be monitored and displayed at a convenient location near the main gate of the company and at important public places.	Compliance to environment clearance along with the monitored data is displayed at company website & also submitted at regional office of MoEF-Bangalore. The levels of PM10, PM2.5, S02, NOx, CO, HBr, NH3 H2S, HF and VOC (ambient levels) & stack emission details are displayed near main gate of the company as per the format prescribed by the KSPCB
09	The company shall install an online monitoring system in the proposed plants with an arrangement to reflect the monitored data on the company's server, which can be accessed by KSPCB on real time basis. In addition to this, the company shall also install online NOx analyzers for the existing boilers. The real time data sharing shall be worked out in the consultation with the KSPCB.	The company is presently monitoring stack emissions through an NABL-accredited laboratory at prescribed intervals, and the emission monitoring details are displayed at the main gate entrance for public information. Further, the company is in the process of transitioning to gaseous fuel, subject to the availability of the required provisions and infrastructure at the SEZ facility. The company shall comply with the requirement of installation of an Online Continuous Emission Monitoring System (OCEMS) and online NOx analyzers in consultation with KSPCB, and the real-time data connectivity arrangement shall be implemented as per the directions of the Board
10	The Company shall obtain Authorization for collection, storage and disposal of hazardous waste under Hazardous and other wastes (Management and Trans boundary Movement) Rules, 2016 for management of Hazardous wastes and prior permission from KSPCB shall be obtained for disposal of solid/ hazardous waste to the TSDF. The	Hazardous waste authorization is obtained With No 348654 dated 09.05.2025 valid till 30 June 2029 Waste generation, storage & disposal is carried out in accordance with the Hazardous waste (management & Transboundary) rules.

	concerned company shall undertake measures for firefighting facilities in an emergency.	Firefighting equipment's has been installed for handling any emergencies. Annexure-2 attached (Hazardous Waste Authorization)
11	The proponent shall ensure that the post project environmental monitoring is carried out through the reputed institutes / organizations in order to assess the changes if any in the marine environment due to disposal of effluent.	As per the environmental clearance issued, our treated effluent is being disposed to the CETP of MSEZ, there is no direct disposal to sea.
12	The project proponent shall maintain proper record of disposal of both the liquid and solid wastes shall be maintained with proper acknowledgements for disposal in accordance with law.	The proper record is being maintained for disposal of both the liquid and solid waste and with acknowledgement for disposal in accordance with law.
13	In plant control measures for checking fugitive emissions from all the vulnerable sources shall be provided. Fugitive emissions shall be controlled by providing closed storage, closed handling & conveyance of chemicals/materials, multi cyclone separator and water sprinkling system. Dust suppression system including water sprinkling system shall be provided at loading and unloading areas to control dust emissions. Fugitive emissions in the work zone environment, product, Raw materials storage area etc. shall be regularly monitored. The emissions shall conform to the limits stipulated by the KSPCB.	Raw materials are handled with closed loop system, which ensures no fugitive emissions is being emitted. Fugitive emissions are monitored through NABL accredited lab once in 3 months as per conditions mentioned in the CTO. Annexure-3: Workplace monitoring report
14	Hazardous chemicals shall be stored in tanks in tank farms, drums, carboys etc. Flame arresters shall be provided on tank farm. Solvent transfer shall be by pumps.	Complied
15	The company shall undertake following Waste Minimization measures: - a. Metering and control of quantities of active ingredients to minimize waste. b. Reuse of by-products from the process as raw materials or as raw material substitutes in other processes. c. Use of automated filling to minimize spillage. d. Use of Close Feed system into batch reactors. e. Venting equipment through vapor recovery system. f. Use of high-pressure hoses for equipment clearing to reduce wastewater generation.	a. Waste minimization through optimization of procedures in done at initial stages of batch planning. b. Re-use of bi-products are being sent to authorized vendors for re-processing. c. Manufacturing areas are fully atomized through the Powder Transfer System & Powder Charging System for raw material handling. d. Closed feed system is installed at the manufacturing areas through Powder Transfer System, Powder Charging System, Double valve hopper system, Glove box system e. Venting equipment connected to heat exchanger & it is connected to primary condenser & secondary condenser. f. Equipment cleaning is done with internally built cleaning mechanism (i.e Spray balls & reflux mechanism)

16	For control of fugitive emission following steps shall be followed: a. Closed handling system shall be provided for chemicals. b. Reflux condenser shall be provided over the reactor. c. System of leak detection and repair of pump/pipeline based on preventive maintenance. d. The acids shall be taken from storage tanks to reactors through closed pipeline. Storage tanks shall be vented through trap receiver and condenser operated on chilled water. e. Catholic protection shall be provided to the underground solvent storage tanks.	a) Closed handling systems is provided for chemical handling such as Powder transmitter system. b) Reflux condensers is provided for the reactors. c) Preventive maintenance schedule is being followed to avoid any leakages or repairs. d) Acid handling is done with closed pipelines and with proper PPEs. Storage tanks vents are connected to trap receiver and condenser operated on chilled water. e) Cathodic protections have been provided for underground storage tanks
17	Solvent management shall be as follows: a. Solvents used in the process shall be completely recovered and reused. b. Efforts are to be made to recover inorganic salts. c. Reactors shall be connected to chilled brine condenser system. d. Reactor and solvents handling pump shall have mechanical seals to present leakages. e. The condensers shall be provided with sufficient HTA and residence time so as to achieve more than 95% recovery. f. Solvents shall be stored in a separate space specified with all safety shall be stored in a separate space specified with all safety measures. g. Proper earthing shall be provided in all the electrical equipment wherever solvent handling is done. h. Entire plant shall be flame proof. The solvent storage tanks shall be provided with breather valve to prevent losses. i. Fugitive emissions in the work zone environment, product, raw materials storage area etc. shall be regularly monitored. The emissions shall conform to the limits imposed by KSPCB.	Agreed and will be followed. a) Solvent used for the process are being recovered. Spent solvents are sent for reprocessing to be authorized vendor. b) Inorganic salts are sent for disposal to authorized facilities. c) Chilled brine condenser system is connected to the reactors. d) Mechanical seals are provided to pumps to prevent leakages. e) Condensers provided sufficient HTA for optimizing solvent recovery. Recovered solvents are disposed to authorized vendors for further processing. f) Solvents are stored in tank farms with all safety measures. g) Earth rite systems are provided for Solvents storage and handling areas. h) All the electrical fittings in the plant and storage tank area are flameproof. Breather valves and Nitrogen inertization facilities provided solvent storage tanks. i) Workplace monitoring is being carried out through external NABL accredited lab.
18	Regular preventive maintenance for avoiding leakage, spillage etc.	Preventive maintenance scheduled is followed for critical equipment's and pipelines
19	Multi-cyclone followed by bag filter shall be provided to the boilers to control particulate emissions within 100 mg/Nm3. The gaseous emissions shall be dispersed through stack of adequate height as per CPCB/KSPCB guidelines.	As per the Corrigendum issued on 21.09.2019 to the environment clearance, the said condition has been revised to "The project proponent shall adopt suitable pollution control measures for control pollution from the boilers and the gaseous emission shall be dispersed through the stack of adequate height as per CPCB/KSPCB guidelines". Hence, we have complied to the requirement of providing stack of 46 meters' height **Annexure-4, Copy of EC corrigendum issued to the site**

20	Two stage chilled water/ caustic scrubber shall be provided to process vents to control HCL Two stage scrubbers with caustic lye media solution shall be provided to process vents to control SO2. The scrubbing media shall be sent to effluent treatment plant (ETP) for treatment. Efficiency of scrubber shall be monitored regularly and maintained properly. At no time, the emission levels shall go beyond the prescribed standards.	Two stage Scrubbers are installed to prevent Acid mist and other emissions. Scrubbing media are being sent to ETP for treatment. Scrubber stack is monitored through NABL accredited lab. Annexure 5: Scrubber Stack monitoring report
21	As proposed spent carbon shall be sent to cement industries. ETP sludge process (Inorganic and organic) and evaporation salt shall be disposed off to the TSDF for land filling /incineration.	Complied
22	Boiler ash shall be stored separately as per CPCB guidelines so that it shall not adversely affect the air quality, becoming air borne by wind or water regime during rainy season by flowing along with the storm water. Direct exposure of workers to fly ash & dust shall be avoided.	Complied
23	During transfer of materials, spillages shall be avoided, and garland drains be constructed to avoid mixing of accidental spillages with domestic waste and storm drains.	Complied
24	Provisions of the manufacture, storage and import of hazardous Chemical rule, 1989 as amended in October 1994 and January 2000 and Factories act, 1948 shall be strictly complied with.	Complied
25	Transportation of hazardous chemicals shall be done as per the provisions of the motor vehicle act and rules.	Complied
26	The Company shall harvest surface as well as rainwater from the rooftops of the buildings and storm water drains to recharge the ground water and use the same water for the various activities of the project to conserve fresh water.	Rainwater collection system is provided in the site . The collected rainwater is utilized for internal requirements
27	The unit shall make the arrangement for protection of possible fire hazards during manufacturing process in material handling. Firefighting system shall be as per the OISD 117 norms.	Complied
28	Training shall be imparted to all employees on safety and health aspects of chemicals handing. Pre-employment and routine periodical medical examinations for all employees shall be undertaken on regular basis. Training to all employees shall be undertaken on regular basis. Training to all employees on handling of chemicals shall be imparted.	Complied
29	Usage of PPEs by all employees/ workers shall be ensured.	Mandatorily PPE is provided to the employees/workers. Additionally, PPE matrixes have been provided at chemical storage and chemical handling areas.

30	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.	Complied
31	The project proponent shall install energy efficient devices and appliances confirming to the Bureau of energy efficiency norms.	Industry has installed LED lights, energy efficient motor & pumps. VFD installed in plant to save energy. Automatic Capacitor control panel installed to maintain power factor. Auto ON/OFF control has been provided to all the Cooling tower fans with respect to ambient temperature.
32	The proponent shall develop green belt on an area of 6 acres as proposed in addition to ensuring development of 33% of the total MSEZ area to be developed as per the condition imposed by the ministry of environment and forest while issuing environment clearance to MSEZ vide letter no. 21-388/2007-IA-III dated 03.04.2008 and 18.06.2015 selection of plant species shall be as per the CPCB guidelines in consultation with the concerned DCF. Heavy foliage indigenous tree species such as Mahagoni, Honge, Akash Mallige, Kadamba Ficus etc hall be planted in addition to that the unit shall take up adequate plantation on roadsides and other open areas. The adequate financial provisions shall be made in the budget of the project for implementation of the above suggested environmental safeguards. Fund so earmarked shall not be diverted for any other purposes.	Site has enmarked dedicated areas for greenbelt development. Plantation is being done with species as per the CPCB guidelines. MSEZ has also developed greenbelt on behalf of Catasynth , which fulfills the requirement of 33% .
33	The company shall comply with the recommendations made in the EIA/EMP / Risk assessment report. Risk assessment shall be included in the safety Manual.	Noted and being complied with. Site has done hazard identification & risk assessment studies for ensuring safety & environment requirement.
34	Provision shall be made for the housing for the construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile sewage treatment plant, safe drinking water, medical health care, crèche etc. The housing may be in the form of a temporary structure to be removed after the completion of the project. All the construction wastes shall be managed so that there is no impact on the surrounding environment.	Not applicable as the unit is inside the Special economic zone. The construction labors housing is outside the site. Basic facilities such as canteen, drinking water, Health centers are provided in the site.
35	Avoids bromination processes. (Wherever followed)	Bromination process is not executed in the site
36	Treatment of recalcitrant to be documented and kept at all times	Recalcitrant processes have not been executed in the site
37	Adopts good management practices (GMP) and green chemistry	Noted and is followed.
38	Storage facilities for the fuel shall be made in the plant area in consultation with Department of Explosives, Nagpur. Disaster Management Plan shall be prepared to meet any eventuality in case of an accident taking place due to storage of Fuel.	PESO licenses have been obtained for storage of flammable chemicals. Onsite Emergency and mock drill is in place for handling any emergencies.

39	The company shall adopt Corporate environment policy as per the ministry O.M. No. J-11013/41/2006-IA.II(I) dated 26.04.2011 and implemented	The company has a Corporate Environment Policy. Annexure-6 attached (Copy of environment policy)
40	Provisions CRZ notification, 2011 Notification no. S. O. 19 (E) 06.01.2011) shall be complied with if any part of the project site falls within the coastal regulation zone as defined in the above said notification.	Not applicable as site does not fall under the CRZ
41	The project proponent shall replace Raney Nickel with Palladium/ Carbon	Specific condition -41, As the group companies Raney Nickel is used as a catalyst in hydrogenation reactions with all the safety measures. Corrigendum/modification applied and received. Corrigendum letter received from SEIAA dated on 21.09.2019 and NO- SEIAA 15 IND 2016 (26.04.2018). Annexure-3, Cope of EC corrigendum issued to the site
42	The Project authorities also shall earmark at least 2.5% of the total cost of the project towards corporate social responsibility and item-wise details along with time bound action plan shall be prepared and submitted to the Authority.	CSR funds are being allocated as required
	B. GENERAL CONDITIONS	
1	The project authorities shall strictly adhere to the stipulations made by the Karnataka State Pollution Control Board (KSPCB).	Noted and is followed
2	At no time, the emissions shall exceed the prescribed limits. In the event of failure of any pollution control system adopted by the unit, the unit shall be immediately put out of operation and shall not be restarted until the desired efficiency has been achieved.	Noted and is followed
3	No further expansion or modifications in the plant shall be carried out without prior approval of the SEIAA / Ministry of Environment and Forests as the case may be. In case of deviations or alterations in the project proposal from those submitted to this Authority to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.	No further expansion or modifications in the plant will be carried out without prior approval of the SEIAA / Ministry of Environment and Forests as the case may be.
4	The gaseous emissions (PM10, PM2.5, SO2 NOx, CO, HBr, NH3, H2S, HF, and VOC) and particulate matter along with RSPM levels from various process units shall conform to the standards prescribed by the concerned authorities from time to time. At no time, the emission levels shall go beyond the stipulated standards. In the event of failure of pollution control system(s) adopted by the unit, the respective unit shall not be restarted until the control measures are rectified to achieve the desired efficiency. Stack monitoring for PM10, PM2.5, SO2 NOx, CO, HBr, NH3, H2S, HF, and VOC shall be carried.	The company is regularly monitoring gaseous emissions and particulate matter parameters including PM10, PM2.5, SO2, NOx, CO, HBr, NH3, H2S, HF, VOC, and RSPM through NABL-accredited laboratories, as per the stipulated norms and frequency prescribed by the concerned authorities. The emission levels from various process units are maintained within the prescribed standards at all times. Adequate air pollution control systems have been provided to ensure compliance with statutory requirements. In the event of any malfunction or failure of the pollution control system, the respective

		unit operations are attended immediately, and necessary corrective measures are undertaken before resuming normal operations to ensure the desired efficiency and compliance standards are achieved. Stack emission monitoring is being carried out periodically for the specified parameters, and records are maintained for verification by the regulatory authorities
5	The project authorities shall strictly comply with the rules and regulations under manufacture, storage, and import of Hazardous Chemicals rules, 1989 as amended in October 1994 and January 2000. All transportation of Hazardous Chemicals shall be as per MVA, 1989. Authorization from KSPCB shall be obtained for collection, treatment, storage, disposal of hazardous wastes.	We will be strictly complying with MVA and Manufacture, Storage and Import of Hazardous Chemicals Rules 1989. We have obtained Authorization for collection, storage and disposal of hazardous waste under the Hazardous and other wastes (Management and Trans boundary Movement) Rules, 2016 for managementof hazardous waste.
6	The project authorities must strictly comply with the rules and regulations with regard to handling and disposal of hazardous waste in accordance with the Hazardous and other Wastes (Management and transboundary movement) Rules, 2016. Authorization from KSPCB must be obtained for collection, treatment/storage/disposal of hazardous wastes.	Hazardous wastes handled in accordance with Hazardous and other Wastes (Management and transboundary movement) Rules, 2016.
7	Application of solar energy should be incorporated for illumination of common areas, lighting for gardens and street lighting in addition to provision for solar water heating. A hybrid system or fully solar system for lighting and heating should be provided. Details in this regard should be submitted to the SEIAA.	The proposal for installation of Solar panels and use of Solar power for lighting purpose is under discussion. Initiation of the project will be communicated to the board at the earliest
8	The overall noise levels in and around the plant area shall be kept well within the standards (85 dBA) by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under Environment (Protection) Act, Rules, 1989 viz, dBA(daytime) and 70 dBA (nighttime).	Overall noise levels are below 75 dBA (Daytime) and below 70 dBA (Nighttime)
9	The project proponent shall also comply with all the environmental protection measures and safeguards as per the information provided.	Noted and is complied with
10	The implementation of the project vis-à-vis environmental action plans shall be monitored by MoEF, Regional Office at Bangalore / KSPCB/ CPCB, and the Regional Director department of Environment and Ecology Mangaluru. A six-month compliance status report shall be submitted to monitoring agencies.	Noted and is complied. Previous 6-month compliance report was submitted on 27.11.2025

11	The project proponent shall inform the public that the project has been accorded environmental clearance by the SEIAA and copies of the clearance letter are available with the KSPCB and may be seen at website of the Authority at http://www.seiaa.kar.nic.in. or http://www.seiaa.karnataka.gov.in. or http://environmentalclearence.nic.in This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspaper that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same be forwarded to the MoEF Regional Office at Bangalore / KSPCB / CPCB and the Regional Director Department of Environmental & Ecology, Mangaluru.	Noted and is complied with
12	The project authorities shall inform the MoEF Regional Office at Bangalore / KSPCB / CPCB and the Department of Environmental & Ecology, Bangalore, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.	Noted and is complied with
13	The SEIAA, Karnataka may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.	Noted and bound to the conditions
14	The SEIAA, Karnataka reserves the right to stipulate additional conditions, if found necessary. The company in a time-bound manner will implement these conditions.	Noted & Agreed to the conditions
15	The above conditions will be enforced, inter –alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986. Hazardous Waste (Management and Handling) Rules, 2003 and the Public Liability Insurance Act, 1991 along with their amendments and rules.	Noted & Agreed to the conditions
16	The issue of Environment Clearance does not confer any right to the project proponent to operate / run the project without obtaining statutory clearances / sanctions from all other concerned authorities.	Noted. Site has obtained all necessary statutory permissions from the other concerned authorities.
17	Concealing factual data or submission of false / fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environmental (Protection) Act, 1986.	Data / information provided in the compliance report are true and as per the conditions which are observed in the plant.
18	Any Appeal against this environmental clearance shall lie with the National Environment Appellate Authority, if preferred, within a period of 30 days as prescribed under section 16 of the National Environment Appellate Authority Act, 2010.	Noted & Agreed to the conditions
19	Officials from the Department of Environment and Ecology, Bangalore / Regional Office of MoEF, Bangalore who would be monitoring the implementation of Environmental safeguards should be given full co-operation, facilities and documents / data by the project proponents during this inspection. A complete set of all the documents submitted to MoEF / SEIAA should be forwarded to the APCCF, Regional Office of MoEF, Bangalore /Regional director department of ecology and environment Mangaluru / Regional Officer, KSPCB Bangalore.	Noted & Agreed to the conditions.

20	In the case of any change(s) in the scope of the project, the project would require a fresh appraisal by this Authority.	Noted & Agreed to the conditions
21	The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner	Noted & Agreed to the conditions
22	All other statutory clearance such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department, Forest Conservation Act, 1980 and Wildlife (Protection) Act, 1972 etc. shall be obtained, as applicable by project proponents from the competent authorities.	Obtained all required licenses from respective departments
23	These stipulations would be enforced among others under the provisions of water (Prevention and Control of Pollution) Act 1974, The air (prevention and control of pollution) act 1981 the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.	Noted & Agreed to the conditions
24	Under the provisions of Environment (Protection) Act, 1986, legal action shall be initiated against the project proponent if it is found that construction of the project has been started without obtaining environmental clearance.	Construction started after obtaining the EC from SEIAA authorities.

Thank you,

Yours Faithfully
